Profile

Aspiring Data Scientist and Machine Learning Engineer with experience in predictive modeling, NLP, big data pipelines, and ML deployment. Skilled in Python, Spark, and cloud-based analytics. Focused on building scalable, data-driven systems for real-world applications.

Technical Skills

Programming	Python (Pandas, NumPy, Scikit-learn, Matplotlib), Basic C, LaTeX
Machine Learning & AI	Regression, Classification, Clustering, CNN, RNN, LSTM, Transformers, Generative AI, NLP
Big Data & Cloud	PySpark, Apache Sedona (GeoSpark), GCP (BigQuery, Looker Studio), ETL Pipelines
Databases	PostgreSQL (Basic)
Visualization & Deployment	Streamlit, Docker, Excel, Google Sheets
Tools	Jupyter, VS Code, Google Colab, Git, GitHub
Geospatial	Google Earth Engine, QGIS, SNAP, Sentinel-1/2

Education

MSc – Data Analytics and Geoinformatics 2024 – Present
Digital University Kerala
CGPA (Sem I: 8.85, Sem II: 8.95)

BSc – Geology with Geoinformatics 2021 – 2024
Sahrdaya College of Advanced Studies, Kodakara
Percentage: 74.85%

Higher Secondary 2008 – 2020
Kendriya Vidyalaya, Cochin Port Trust
Grade: 80.2%

Projects

Real-Time News Sentiment Analysis & Deployment
Developed an end-to-end Spark-based NLP pipeline with structured streaming, real-time visualization, and

Dockerized deployment.

Job Description Clustering Using NLP
Built an automated job classification system using TF-IDF vectorization and K-Means clustering for intelligent role grouping.

Vehicle Fuel Efficiency Prediction
Implemented regression models with feature engineering, outlier treatment, and residual analysis to improve reliability.

Music Genre Classification Using CNN
Designed and trained a CNN-based music genre classifier using MFCC features on the GTZAN dataset with validation-based evaluation.

Gen-AI Powered Cold Email Generator
Developed an LLM-powered automation tool using LangChain, ChromaDB, and Groq LLM for personalized email generation.

LULC Classification and Urban Change Detection
Built Random Forest-based land use classification models using NDVI, NDBI, BSI, and NDWI features.

Spam and Ham Email Classification with Streamlit
Developed a binary text classification system using TF-IDF and machine learning models to detect spam emails, with interactive deployment using Streamlit.

Certifications

Google Cloud Career Launchpad – Data Analytics Track (2024)
Google Cloud Career Launchpad – Computing Foundations Track (2024)

Leadership & Activities

Student Representative, IQAC (2022–2023)
Volunteer, NSS UPES (2021–2023)

Languages

English, Hindi, Malayalam
